Education

University of Virginia — Charlottesville, VA
Bachelor of Arts in Computer Science — August 2024 - Present
Cumulative GPA: 3.734

Relevant coursework: Applied Linear Algebra (A+), Data Structures & Algorithms I (A), Computer Systems & Organization I (A), Discrete Mathematics (A), Software Development Essentials (A-), HCI in Software Development (A-)

Experience

The Computer Science Department of University of Virginia — January 2026 - ongoing
Teaching Assistant for CS 2120: Discrete Mathematics and Theory — Charlottesville, United States

- Graded student assignments like problem sets and exam questions and provided tips on problem solving and proofs
- Hosted review sessions to help students find a way to apply what they've learned, write coherent proofs under stress
- Collaborated with instructors to expedite the grading process and come up with innovative measures against cheating

University of the Chinese Academy of Sciences — May 2025 - ongoing
Research Assistant — Beijing, China

- Assisted graduate researchers in computer vision lab with image target detection algorithm development
- Conducted data annotation for 1,900 text-image pairs to train and validate image processing models
- Gained hands-on experience with supervised/unsupervised learning techniques, including random forest and decision tree models
- Collaborated on experimental design and result analysis for ongoing computer vision projects

StreamHorseTV — Sep 2025 - Dec 2025
Digital Media Intern (Remote) — Charlottesville, United States

- Rewrote the website with a modern look and powered by Flask to make the site more customizable and responsive
- Redesigned newsletter template and other visuals with a unified design language

Projects

Web Designer and Developer — October 2022 - Present
Personal Website https://jerryly.cn

- Under the VS Code IDE, utilized HTML to create content, CSS to design the appearance, and JavaScript to build "welcome" and "countdown" pages and common layout injection
- Optimized performance and user experience with responsive design and interactive elements
- Continued exploration into the backend with a separate blog subdomain powered by Flask

Interactive blog system — February 2023 - Present
An extension on my current web project

- Building a blog system where anyone can post anything with the help of SQL
- Learning React to make my website reduce lines of code and improve responsiveness

Honors and Awards

Dean's List of the College of Arts & Sciences of University of Virginia — Sep 2024 – Present
From Fall 2024 semester to Fall 2025 semester

International Genetically Engineered Machine (iGEM) — March 2022 – November 2022
Gold Medal; Top 10 Global High School Team; Best Presentation; Best Wiki

High School Mathematical Contest in Modeling (HiMCM) — November 2022 – May 2023
Honorable Mention

Fluent in

Programming Languages
Python, Java, HTML/CSS, C

Languages
Chinese (Mandarin), English, French

Developer Tools
Git/GitHub/GitLab, Stack Overflow

Frameworks and Libraries
Flask, React

IDEs and Editors
IntelliJ IDEA, Nano, Visual Studio Code

Graphic Designing
Styling web/apps with Photoshop, Illustrator
