Jerry is a second-year student at the University of Virginia majoring in Computer Science (Bachelor of Arts) whose passion for computers began at the age of five. He became acquainted with programming languages such as C in sixth grade, and later explored Python and Java. He has built small JavaScript projects, including a calculator available on his website, jerryly.cn. He has taken five computer science courses, covering topics of computer systems and organization, data structures and algorithms, software development essentials, human-computer interaction, and discrete mathematics.

Education

University of Virginia — Charlottesville, VA
Bachelor of Arts in Computer Science, Cumulative GPA: 3.734 — August 2024 - Present

Relevant coursework: Applied Linear Algebra (A+), Data Structures & Algorithms I (A), Computer Systems & Organization I (A), Discrete Mathematics (A), Software Development Essentials (A-), HCI in Software Development (A-)

Second High School attached to Beijing Normal University — Beijing, China
Honor Roll Student, Cumulative GPA: 4.6/4.0 — August 2021 - June 2024

Experience

Assistant Researcher — May 2025 - ongoing
University of the Chinese Academy of Sciences — Beijing, China

- Helped with graduates' research on image target detection at the Computer Vision laboratory at UCAS
- Helped with data labeling on 1,900 text-based image comparisons to calibrate an image processing model
- Learned basics of supervised and unsupervised learning and models like random forest and decision trees

Web Designer and Developer — October 2022 - Present
Personal Website https://jerryly.cn

- Under the VS Code IDE, utilized HTML to create content, CSS to design the appearance, and JavaScript to build "welcome" and "countdown" pages and common layout injection
- Optimized performance and user experience with responsive design and interactive elements
- Continued exploration into the backend with a separate blog subdomain powered by Flask

Graphic Design Enthusiast — 2019 - Present
Gallery of works available at https://jerryly.cn/pages/gallery

- Using tools like Figma, Sketch, Photoshop and Illustrator, designed numerous posters, infographics and user interfaces for high school major events and publications
- Progression to 3D designs with Blender enabled me to utilize glass and shading to create intriguing visuals for the posters and advertise my design

Digital Media Intern (Remote) — Sep 2025 - Dec 2025
StreamHorseTV — Charlottesville, United States

- Rewrote the website with a modern look and powered by Flask to make the site more customizable and responsive
- Redesigned newsletter template and other visuals with a unified design language

Projects

Interactive blog system — February 2023 - Present
An extension on my current web project

- Building a blog system where anyone can post anything with the help of SQL
- Learning React to make my website reduce lines of code and improve responsiveness

Honors and Awards

Dean's List of the College of Arts & Sciences of University of Virginia — Sep 2024 – Present
From Fall 2024 semester to Fall 2025 semester

International Genetically Engineered Machine (iGEM) — March 2022 – November 2022
Gold Medal; Top 10 Global High School Team; Best Presentation; Best Wiki

High School Mathematical Contest in Modeling (HiMCM) — November 2022 – May 2023
Honorable Mention

Fluent in

Programming Languages
Python, Java, HTML/CSS, C

Frameworks and Libraries
Flask, React

Languages
Chinese (Mandarin), English, French

IDEs and Editors
IntelliJ IDEA, Nano, Visual Studio Code

Developer Tools
Git/GitHub/GitLab, Stack Overflow
